

Forklift Electrical Parts

Electrical Parts for Forklifts - Lift trucks along with other forklifts can have particular labels for use in some hazardous locations. The mark denotes that this particular model of forklift meets the minimum standards of ANSI/UL 553 used for electric forklifts or ANSI/UL 558 used for internal combustion engine forklifts.

Applications for labeled trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Consult your local insurance carrier and Fire Marshall for further information about the approved uses of industrial powered trucks in your application.

If the specific lift truck satisfies the outlined criteria, labels can be placed. A labeled lift truck would show the type of designation located on the nameplate and will have a correctly corresponding label put.
